

Environmental Policy

MOL Logistics Co., Ltd. is committed to

- Appropriately responding to the environment impact of our business activities and services.
- Setting environmental objectives and targets, establishing a framework to periodically review them, and taking measures to promote environmental conservation and prevent damage to the marine and global environment.
- Complying with all environmental legislation and regulations required by law, and other requirements that we are subject to, and further reducing our burden on the environment by setting and achieving voluntary standards.
- Making ongoing efforts to reduce the consumption of energy and resources, reduce waste generation, and minimize costs.
- Documenting our objectives, targets, procedures, and so on to put the above commitments into action, widely disseminating the documentation to employees and other concerned parties inside and outside the company, and building internal awareness of environmental issues through educational programs and public relations activities.
- Announcing our Environmental Policy inside and outside the company through the company website and so on, and disclosing our environment-related initiatives.
